REGISTERING A DOMAIN WITH GODADDY

STEP-BY-STEP GUIDE

Follow these steps to register a domain name with GoDaddy and secure your online presence. Prefer not to do this yourself? Aurora Web Designs can handle it for you — just reach out.

1 Visit GoDaddy's Website

- Go to GoDaddy.com to get started.

2 Search for Your Domain Name

- Type your desired domain in the search bar and click Search Domain.
- If it's taken, try GoDaddy's suggestions or another name.

3 Choose Your Domain Options

- Pick any extra extensions (.net, .org, etc.).
- Add Privacy Protection to hide your personal info from public WHOIS records.
- Add optional extras like email hosting or an SSL certificate.

4 Review Your Cart

- Check the domain, registration term, and any add-ons.
- Adjust the term length if needed, then continue.

5 Create or Log In to Your Account

- New to GoDaddy? Click Create Account and fill in your details.
- Already have one? Just log in.

6 Complete the Payment

- Enter your billing info and review the order total.
- Click Complete Purchase to finalize.

7 Confirm Your Registration

- GoDaddy will email you a confirmation.
- Verify your email address if prompted.

8 Manage Your Domain

- Go to My Products > Domains to find your new domain.
- From there: update DNS, add email hosting, or set up your site.

TIPS FOR CHOOSING A DOMAIN NAME

- Keep it Simple — choose a name that's easy to remember and type.
- Be Relevant — reflect your brand or business purpose.
- Consider Keywords — include relevant keywords for SEO benefits.
- Avoid Special Characters — stick to letters and numbers for usability.
